

Minitemp & Thermolabels

Infrared thermometer & temperature strips

Temperature indicators for heat seal machines

The Minitemp portable infrared thermometer

Just point the red laser dot on the heating element and shoot for quick and easy temperature measurement.

Highlights • Accurate heat indication • Quick and dependable • Easy to use

Why check temperature?

The temperature of your heat seal press is critical for good sealing results.

Too high a temperature can damage the fabric, too low can lead to label loss.

Minitemp Portable Infrared Thermometer

With the Minitemp Infrared Noncontact Thermometer checking the temperature of your heat seal press is an easy job. Just point the red laser dot on the object and shoot for quick and easy temperature measurement. The digital display clearly indicates the temperature, in °C or in °F.

The clear digital display of the Minitemp.

The unit will hold the reading for 7 seconds. The presence of the battery icon indicates a low battery.

Thermolabels

Thermolabels are cost effective, accurate temperature strips. Their rapid reaction records the temperature of any Thermopatch heat seal press.

The illustration shows how the label should read after five seconds between the platens of your heat seal press.

How to use Thermolabels

As the specific temperature is attained, the Thermolabel reacts with a sharply defined colour change from transparent to black.

Black

The temperature exceeds the indicated value.

Grey

The temperature is between this value and that of the previous indicator.

Unchanged

The temperature has not reached the indicated value.
